

## **T&M Specialists Canada offers a full range of tunnelling and mining specialist services throughout North America.**

As Hong Kong based T&M Specialists nears 10 years of providing services to the global Tunnelling and Mining industries, they continue to strengthen their international foothold by announcing the formation of T&M Specialists Canada; with other international offices comprising of T&M UK and T&M International based in Australia.

T&M Canada provides contracting services to the mining & tunnelling industries including EFNARC certified shotcrete specialists' throughout North America and have already amassed a long list of successfully completed projects in the region. These include:

### **John Hart, Campbell River, BC**

T&M Specialists were engaged by Normet Canada in 2015 to provide EFNARC Shotcrete Specialists to Train & Certify local Nozzlemen to EFNARC Standards.

### **East Side Access Metro, NYC**

T&M Specialists were engaged by Normet USA to provide Shotcrete Specialists to train & certify the local Nozzlemen using state of the art, Normet 8100 Spraymecs, which is equipment designed to apply shotcrete using Robotic Systems. During this project T&M also helped to demonstrate and apply the shotcrete during a 6 month period of being onsite.

### **Elko, Nevada**

T&M Specialists were hired by Normet USA to provide EFNARC Shotcrete Specialists to Ttrain & Ccertify Llocal Nozzlemen working in the mines to EFNARC Standards.

### **PRHP, Fort St John, BC**

T&M Specialists were engaged by Peace River Hydro Partners (PRHP) in 2018 to provide EFNARC Certified Shotcrete Specialists to oversee all shotcrete operation onsite. This included Training & Certifying Local Nozzlemen with EFNARC shotcrete standards and continually monitoring their progress, working closely with the QA/QC team and providing Monthly Reports as well as signing off on all Daily Shotcrete Reports, re-created the previous format to help capture all the aspects in both Underground & Above Ground Applications & Troubleshoot any issues which were encountered. In addition to supplying
